

CERTIFICATE

EngineeringAdvantage™

This certificate is proudly presented to:

Ibrahim Gokhan Zengin

for completing **Introduction to Data Modeling with Project Haystack**. In an increasingly digitalized world, buildings must adapt to the expectations of their occupants. Between the technological advances of the Internet of Things and the demand for enhanced occupant experience, more and more data are being demanded from building automation systems. This presentation will focus on Project Haystack and how tagging can help manage multiple building systems collecting data from multiple places.

This document certifies the above mentioned participant has attended the educational session as provided by Bill Coyle of Siemens Industry, Inc. This course has been approved for credit by the AIA Continuing Education System for 1.0 LU. AIA education provider (L192); Florida education provider (0005127). Other CEU credits may apply.
